

World Federation of Neurology Travel Awardee from India presented his research in the Society for Neuroscience Meeting at San Diego, USA

Dr. Sudip Paul, Assistant Professor, Department of Biomedical Engineering, North-Eastern Hill University, Shillong, INDIA got an opportunity to present his research as poster presentation titled “**Lyapunov Exponent: A tool to evaluate the degree of neuronal insult in rat model of ischemic stroke**” at the Society for Neuroscience (SfN) Conference (NEUROSCIENCE 2016) at San Diego, USA during November 12-16, 2016. He was awarded the Junior Travelling Fellowship 2016 by World Federation of Neurology (WFN) with an amount of GBP 1000 towards his travel to USA. Dr. Paul is working in the field of brain signal analysis in living system. He said “*I was benefited in the form of exposure to my research field and provided me with an opportunity to learn about different aspects of brain signal acquisition and its interpretation to derive a fruitful result from the experimentation and also provided me a platform to be exposed to the cutting edge advancement in the field of Neuroscience*”. He was able to interact with the neuroscientists who are working in his area. He was thankful to his university administration for necessary requirements.
